Coffee Kiosk Jira Evidence

Lab 2 | Venkatesh Panda | PES1UGCS524

COFFEE Jira board

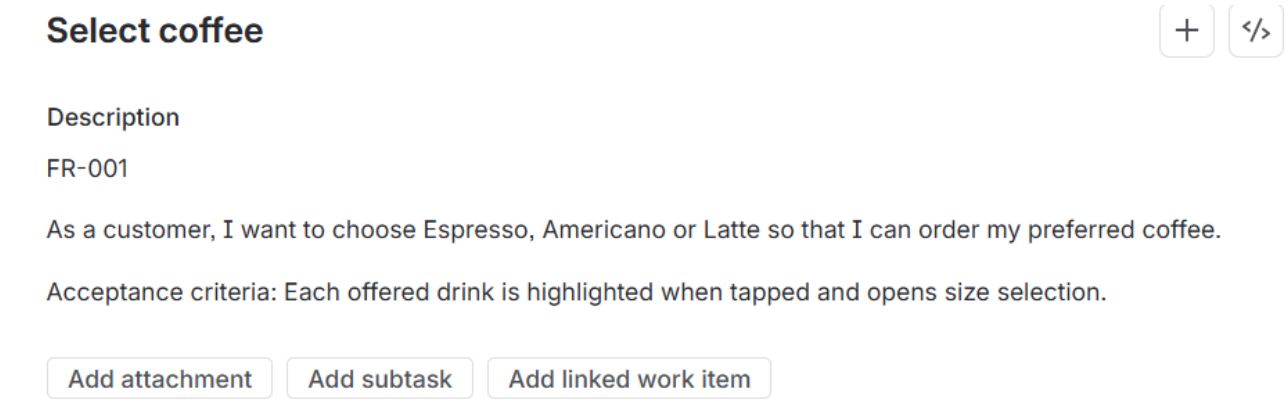

Completed sprint simulation

Sprint 1 closed with 7 points across COFFEE-3 (2), COFFEE-4 (2), and COFFEE-5 (3), under Configure a Coffee (COFFEE-1).

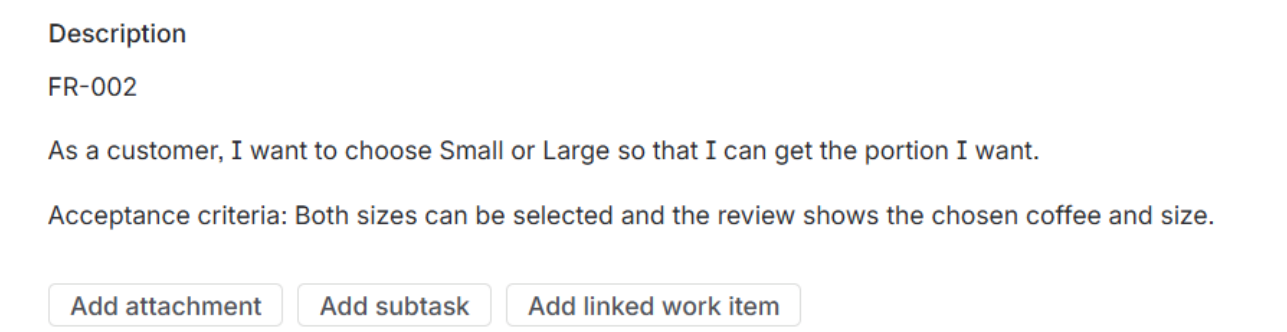

Sprint 2 closed with 8 points across COFFEE-6 (5) and COFFEE-7 (3), under Complete Checkout (COFFEE-2).

All five stories moved through In Progress to Done. The estimates and sprint outcomes above come from Jira records. The screenshots below show story descriptions and acceptance criteria. They do not show the estimate field, backlog, active sprint board, or native burndown charts.

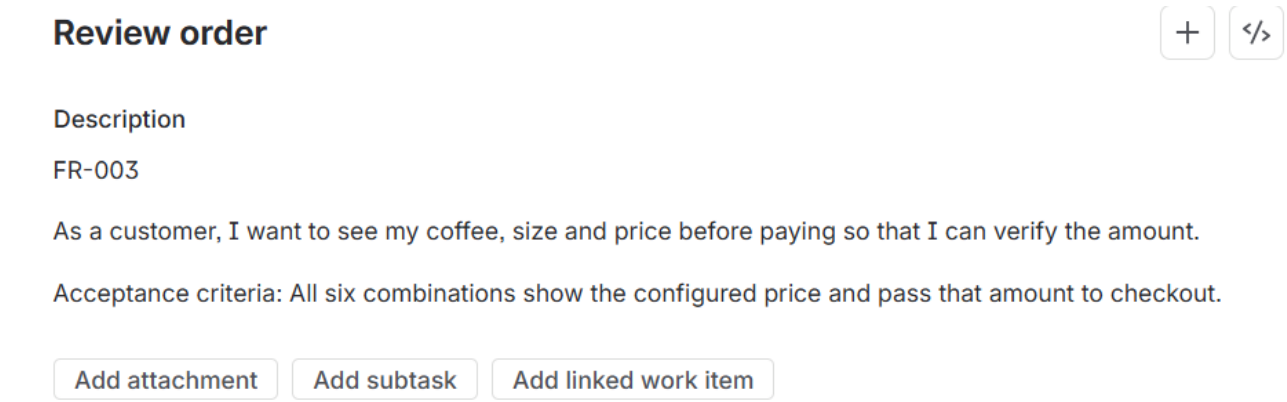

COFFEE-3 | Select coffee

COFFEE-4 | Select size

COFFEE-5 | Review order

COFFEE-6 | Pay by credit card

Pay by credit card

Description

FR-004

As a customer, I want to pay by credit card and retry a decline so that I can complete checkout.

Acceptance criteria: Approval records a paid order. A decline retains the choices and offers retry.

COFFEE-7 | Print receipt

Print receipt

Description

FR-005

As a customer, I want to receive a printed receipt so that I can keep a record of my purchase.

Acceptance criteria: An approval prints one receipt with order ID, coffee, size and amount. A decline prints none.
